

ALLIANCE
CABINET SYSTEMS

About

At Alliance, we make custom cabinets and closet systems, designed and built specifically for you, that stand the test of time. Our cabinets and closet systems are made for custom homes, renovations, and commercial projects.

Process

ESTIMATING

We start by gathering enough information about your project to give you a ballpark estimate. Send us as much information as you can and if we need something more, we'll email you for that information.

- Pictures of the Space
- Dimensions of the Space
- Builder Prints
- Inspiration Images

DESIGNING

If our estimate fits your budget, a design payment of 10% of the estimate will reserve your place on our schedule and get us started on the design process. Each project has a minimum starting price at \$2000. After the payment is processed, we will contact you to schedule a time for an initial consultation where we will discuss your cabinet needs and layout. We'll discuss every detail of your project and determine precise measurements, until we land at your final project details.

CONFIRMATION

After checking and rechecking measurements and details, we will have you sign off on the final design, and give you a quote for the entire project. Your design payment is credited toward that total cost. Upon receiving the deposit, 50% of remaining cost, for the work to be completed, we'll begin construction.

Process

DELIVERY

Once your cabinetry is built, we will send you videos of your cabinets so you can confirm we have completed the project. At that point you will pay the balance of the project, plus delivery fee (if applicable). We will coordinate delivery with you or your builder, or arrange for you to pick it up from our shop. If your project is within our service range, we can give you a quote for installation.

TEMPLATING

After installation, your countertops will need to be templated. If you are working with a builder, they will probably handle this for you. If you're doing it on your own, we can give you some suggestions on finding a company to provide that service in your area. Our designers can also help you think through looks that will coordinate well with your cabinetry. Be sure to ask us about this!

FINISHING

You're almost finished! Talk with your builder about installing the hardware for your cabinetry (or do it yourself, of course). Our designers can help source pulls, handles, or latches. Please ask us about this, too! Finally, you get to style your new cabinetry. Our designers would be happy to discuss this with you, and provide a curated list of styling items and arrangements.

Upper Cabinets

Lower Cabinets

Vanity Cabinets

Built-In Cabinets

Cabinetry Production Details
